

MAC ONE BEAM

ULTRA-COMPACT BEAM MOVING HEAD

SPEC SHEET

The **MAC One Beam** from Martin Professional is the newest member of the MAC One family—designed to deliver tight, high-intensity beams and captivating eye-candy effects in a compact, lightweight form. Built for lighting designers and rental professionals, MAC One Beam expands creative possibilities, free from weight, size or budget constraints.

At its core sits an automotive-grade LILI (Laser Illuminated Lighting Instrument) engine, engineered for precision and reliability. This compact light source produces an exceptionally sharp beam with an intensity of 7 million candela—more than enough for bold aerial effects in concert, TV, and event environments. MAC One Beam's optimized output alleviates growing industry concerns around eye safety, offering a responsible balance of performance and protection.

MAC One Beam excels in three key areas. First, its razor-sharp beam and fast CMY color mixing deliver dynamic, high-contrast effects with snappy responsiveness. Second, its compact footprint and sub-5 kg weight allow dense fixture deployment, unlocking bold looks while reducing transport costs and rigging complexity. Third, a mesmerizing three-dimensional backlight effect—featuring individually controllable light guides behind a bold 120 mm lens—adds visual depth and stage presence, even when the beam is idle.

Designed for versatility, MAC One Beam integrates seamlessly with its sibling, the MAC One wash fixture, using a unified ecosystem of rigging accessories, including the MAC One Fourbar and VDO Grid Mount System. This compatibility empowers designers to mix fixture types freely—combining beam and wash functionality within the same rig, layout, or flightcase—without sacrificing efficiency or cohesion.

Whether building dynamic arrays, linear matrices, or immersive light walls, shared accessories simplify setup and expand design flexibility. With the MAC One Beam and the MAC One wash fixtures working in tandem, designers gain more creative freedom to craft layered, multidimensional looks using compact fixtures that rig fast and scale effortlessly.

From low-ceiling installations to high-impact concert rigs, MAC One Beam empowers designers to think bigger, rig smarter, and elevate every show with compact brilliance and eye-catching flair.

FEATURE HIGHLIGHTS

COMPACT FORM + MASSIVE IMPACT

MAC One Beam delivers an intense 7 Mcd beam from a fixture weighing under 5 kg, offering an exceptional output-to-size ratio. Its compact footprint enables dense deployment without compromising punch or precision.

AUTOMOTIVE-GRADE LILI ENGINE + SAFER BEAM PERFORMANCE

Powered by an automotive-grade LILI engine, MAC One Beam produces a razor-sharp, high-contrast beam while alleviating growing industry concerns around eye safety, offering a responsible and unmatched balance of performance and protection.

FAST CMY MIXING + SPLIT COLOR CREATIVITY

The fixture's rapid CMY color mixing enables smooth transitions and vibrant split-color effects. Designers can achieve dynamic looks with snappy responsiveness and rich tonal control.

THREE-DIMENSIONAL BACKLIGHT EYE CANDY

Behind the bold 120 mm lens, 24 RGB LEDs create a captivating backlight effect with pixel control. Even when the beam is idle, MAC One Beam adds visual depth and stage presence.

RIGGING VERSATILITY + SEAMLESS INTEGRATION

MAC One Beam shares accessories with the MAC One wash fixture, including the Fourbar and VDO Grid Mount System. Designers can mix fixture types freely, creating cohesive rigs, matrix layouts, and "walls of light" with ease.
